Ingredients

1 1/4 cups warm water, 105 - 110F

1/2 tsp active dry yeast

1 tsp honey

1/2 Tbsp fine sea salt

Cookbook

3 1/3 cups all-purpose flour, (measured correctly) plus more to dust

Instructions

HOW TO MAKE PIZZA DOUGH

- 1 In a small bowl, stir together water, honey, and salt then sprinkle the top with 1/2 tsp yeast and let sit 5 minutes then stir.
- 2 Measure 3 1/3 cups flour in a large mixing bowl and make a well in the center. Pour yeast mixture into the center then stir with a firm spatula until the dough comes together. Knead by hand 2 minutes (dough will be sticky). Cover the bowl with plastic wrap and let rise at room temperature 4-5 hours or until doubled in size.

- 6 Lift the dough over both knuckles and roll your knuckles under the center of the dough, working outward as you rotate the dough along your knuckles and leaving a thicker crust at the edge. Continue working the dough until a 10-12" pizza has formed. It will shrink slightly so make it a little bigger than you think. Place the dough down on a lightly floured pizza peel. Give the pizza peel a little shake to make sure the pizza slides over it and is not sticking.
- 7 Spread on desired pizza sauce and toppings. Give the pizza another jolt to make sure it slides on the pizza peel (you don't want it to stick while transferring it into the oven). Slide pizza onto the preheated pizza stone and bake at 550°F for 8-10 minutes or until crust is golden
